Subject: re: Navy/Bethpage - status of CA725 - Human Exposures Currently Under Control

Good morning Steve and Henry -

I hope everything is going well for both of you. I was asked for a status update regarding the Environmental Indicator '*Human Exposures Currently Under Control*' at Navy/Bethpage. My recollection is that the only remaining issue was off-site soil contamination. When you have the chance, I would be interested in discussing what still needs to be done to achieve the CA725 EI determination, and approximately when you think it could be done. Or, you can feel free to email me if that works better for you. Thanks.

Happy Thanksgiving Day.

-Carol-
